Cancer Prevention Virtual Awareness

Venue: Ideal Institute of technology, Wada

Coordinators:

World Cancer Day is an international day marked on 4 February to raise awareness of cancer and to encourage its prevention, detection, and treatment. World Cancer Day is led by the Union for International Cancer Control (UICC) to support the goals of the World Cancer Declaration, written in 2008.

Increasing cancer awareness in more deprived areas could help to reduce health inequalities and improve cancer outcomes. Having cancer awareness will give you the confidence to speak to a doctor if something doesn't feel normal to you, as spotting cancer early increases the chance of survival.

On the occasion of World Cancer Day, Ideal Institute of Technology organized an awareness session on Cancer Prevention and Healthy Lifestyle.

In order to make the youth aware of the same and indulge them into following a healthy lifestyle to prevent cancer, this informative session was held among the NSS volunteers, so that they can spread and inculcate these values to one and all. The session began with a short introduction of what are the objectives to the webinar and what an individual can learn of the day's session.
