

Civil Engineering Department

Industrial Visits Reports

Ideal Institute of Technology, Wada organized its first 3-day industrial visit for B.E.(Civil Engineering) and students from March 25 Sep,2021 to 27 Sep, 2021. The companies visited were Design and construction of bridge across river mandovi which are situated in panaji Goa. A total of 55 students were a part of the industrial visit. Mr.Rakesh Rathore and Ms.Yogini Patil from Civil Engineering were the faculty co-ordinators who accompanied 55 students.

Industrial Visit Outcomes:

- To provide an exposure to students about practical working Environment in Design and construction of bridge across river
- To fulfil the gap between theoretical and practical learning in a real-life environment.
- To provide opportunities for interactive learning in-class as well as outside the classroom surroundings.
- To enhance professional skills.
- To widen students' viewpoint with experience to different workforces from different industries.

About bridge

The **Mandovi bridge** is a set of two bridges. It carries four lanes over the Mandovi river. It was Russian in design and the first to be used in this country. The first Mandovi bridge was built in 1971 and the second one in 1998.

On 5 July 1986 the first bridge collapsed. After the collapse, this project required the dismantling of the old bridge structure and strengthening with by filling M20 concrete. The total cost of construction was 20 million (US\$250,000). The parallel bridges have a length of 600 metres each.

The 3rd bridge over the river Mandovi in Goa is an iconic bridge that connects Panaji in Tiswadi Taluka and Porvorim in Bardez Taluka in between the existing two bridges to ease traffic congestion along this route. It was declared open on January 27, 2019.

As one of the longest cable stayed bridges in India, the 4-lane, 21m-wide, 620m-long continuous span, 3.6 km Mandovi River Cable Stayed Bridge adds architectural beauty to Panaji, standing tall 70m above sea level with the central concrete pylons spaced at 150m, supported by 88 cables on a single plane, harp type cable stay arrangement.

Dextra supplied 1,170 sets of fully-threaded post-tensioning bar systems in diameter 25, 32, 40, 50 and 75mm, in grade 830/1030 for use in various applications.

Civil Engineering Department

Industrial Visits Reports

Ideal Institute of Technology, Wada organized its first 5-day industrial visit for B.E.(Civil Engineering) and students from Oct 31, 2021 to April 04, 2022. The Site visited were Supa dam and power house which are situated in Dandeli, Karnataka. A total of 50 students were a part of the dam site visit. Mr. Govind Gehlot and Ms. Yogini Patil from Civil Engineering were the faculty co-ordinators who accompanied 50 students.

Industrial Visit Outcomes:

To provide an exposure to students about practical working Environment in dam and power house

- To fulfil the gap between theoretical and practical learning in a real-life environment.
- To provide opportunities for interactive learning in-class as well as outside the classroom surroundings.
- To enhance professional skills.
- To widen students' viewpoint with experience to different workforces from different industries.

About Dam

Located in Joida Taluk of Dandeli, the Supa Dam marks its reputation as a hotspot for the travelers of Dandeli. Since ages, the Supa Dam has been acknowledged as one of the leading hydroelectric power generation plants in the town. The other significance of the dam construction has been availing the dam water to the nearby farmers to meet their irrigation needs.

So, if you are curious about how the irrigation system works, it is a golden opportunity for you to broaden the spheres of your knowledge reserves. You can get along with some technical expertise or even the local farmers to understand the mechanism of both hydroelectric power generation and irrigation facilities available here.

Apart from its commercial importance, the dam has been blessed with a picturesque backdrop to sit, relax, and unwind yourself. Due to its economic and cultural aesthetics, the location has become a popular sightseeing destination in town.

Civil Engineering Department

Industrial Visits Reports

Ideal Institute of Technology, Wada organized its first 3-day industrial visit for B.E.(Civil Engineering) and students from March 31, 2022 to April 02, 2022. The companies visited were Adani Petronet Pvt. Ltd which are situated in Dahej Gujarat. A total of 46 students were a part of the industrial visit. Mr. Rakesh Rathore and Mr. Govind Gehlot from Civil Engineering were the faculty co-ordinators who accompanied 46 students.

Industrial Visit Outcomes:

To provide an exposure to students about practical working Environment in largest commercial ports

- To fulfil the gap between theoretical and practical learning in a real-life environment.
- To provide opportunities for interactive learning in-class as well as outside the classroom surroundings.
- To enhance professional skills.
- To widen students' viewpoint with experience to different workforces from different industries.

About company

Adani Ports and Special Economic Zone Limited (APSEZ) is the largest commercial ports operator in India accounting for nearly one-fourth of the cargo movement in the country. Its presence across 13 domestic ports in seven maritime states of Gujarat, Maharashtra, Goa, Kerala, Andhra Pradesh, Tamil Nadu and Odisha presents the most widespread national footprint with deepened hinterland connectivity. The port facilities are equipped with the latest cargo-handling infrastructure which is not only best-in-class, but also capable of handling the largest vessels calling at Indian shores. Our ports are equipped to handle diverse cargos, from dry cargo, liquid cargo, crude to containers.

Through its subsidiary Adani Logistics Ltd., APSEZ operates three logistics parks located at Patli in Haryana, Kila-Raipur in Punjab and Kishangarh in Rajasthan. With the ability to handle 500,000 twenty foot equivalent units (TEUs) annually, the Adani logistics business is growing at a rapid pace.

Over the years, APSEZ has evolved into a provider of integrated port infrastructure services, of which the Mundra SEZ in Gujarat is a landmark validation. Spanning over 8,000 hectares,

the Mundra Economic Hub offers investment options as the largest multi-product SEZ, Free Trade and Warehousing Zone (FTWZ) and Domestic Industrial Zone.

The Company's integrated services across three verticals, i.e. Ports, Logistics and SEZ, has enabled it to forge alliances with leading Indian businesses making APSEZ an undisputed leader in the Indian port sector.

Along with its expertise in providing end-to-end logistics solutions, operational excellence, low-cost operations and synergies through acquisitions, APSEZ was also certified as a Great Place to Work in FY 2021-22. The Company is backed by a young and dynamic workforce that propels it to greater heights.

Organizing Department	: Computer Science & Engineering
Name of Activity	: Guest Lecture on Internet Security & Ethical Hacking
Date of Activity	: 21 August 2023
No. of Participants	: 57
Resource Person	: Mr. Hariom Awasthi

Introduction:

Ideal Institute of Technology had the privilege of hosting an insightful guest lecture on the crucial topics of Internet Security and Ethical Hacking. The lecture was designed to equip students with an understanding of cyber security threats and ethical hacking practices, providing valuable insights into the rapidly evolving landscape of online security.

Guest Speaker:

The guest speaker for the session was Mr. Hariom Awasthi Associate Professor CSMU Panvel, Navi Mumbai, Maharashtra, a renowned expert in the field of cybersecurity. With a wealth of experience and expertise, Mr. Hariom Awasthi brought a dynamic and practical perspective to the topics of internet security and ethical hacking.

Session Highlights:

Understanding Cybersecurity Threats:

The session commenced with an overview of the current cybersecurity landscape, highlighting the prevalent threats and challenges faced in the digital realm. Mr. Hariom Awasthi emphasized the importance of staying informed about potential risks to safeguard personal and organizational data.

Ethical Hacking:

A significant portion of the lecture was dedicated to ethical hacking – a practice aimed at identifying vulnerabilities in computer systems to strengthen security. Mr. Hariom Awasthi explained the ethical hacker's role in proactively testing systems for weaknesses and implementing robust security measures.

Cybersecurity Best Practices:

The lecture provided practical insights into cybersecurity best practices, covering topics such as password management, secure online behavior, and the importance of regular software updates. Mr. Hariom Awasthi emphasized the role of individuals in maintaining a secure online environment.

Real-Life Case Studies:

To illustrate the practical application of ethical hacking, Mr. Hariom Awasthi shared real-life case studies where ethical hacking techniques were employed to identify and rectify security vulnerabilities. These case studies provided valuable insights into the complexities of

cybersecurity.

Interactive Q&A Session:

The session included an interactive Q&A segment where students had the opportunity to engage with Mr. Hariom Awasthi, seeking clarification on various aspects of internet security and ethical hacking. This interactive format facilitated a deeper understanding of the subject matter.

Feedback and Engagement:

Following the lecture, students were encouraged to provide feedback on the session, expressing their thoughts and insights gained. The engagement and enthusiasm demonstrated by the students reflected the success of the guest lecture in capturing their interest and fostering a keen interest in cyber security.

Closing Remarks:

The guest lecture on Internet Security & Ethical Hacking concluded with closing remarks from Mr. Hariom Awasthi, expressing gratitude to Ideal Institute of Technology for the opportunity to share knowledge with the students. Mr. Hariom Awasthi, encouraged students to delve deeper into the field of cybersecurity, emphasizing its critical role in the digital age.

Conclusion:

The guest lecture on Internet Security & Ethical Hacking proved to be a valuable addition to the academic experience at Ideal Institute of Technology. The knowledge shared by Mr. Hariom Awasthi empowered students to navigate the digital landscape responsibly, understanding the importance of cybersecurity practices and ethical hacking in ensuring a secure online environment. The institute looks forward to organizing similar engaging sessions to further enrich the learning experiences of its students.

Civil Engineering Department

Industrial Visits Reports

Ideal Institute of Technology, Wada organized its first 5-day industrial visit for B.E.(Civil Engineering) and students from Oct 31, 2021 to April 04, 2022. The Site visited were Supa dam and power house which are situated in Dandeli, Karnataka. A total of 50 students were a part of the dam site visit. Mr. Govind Gehlot and Ms. Yogini Patil from Civil Engineering were the faculty co-ordinators who accompanied 50 students.

Industrial Visit Outcomes:

To provide an exposure to students about practical working Environment in dam and power house

- To fulfil the gap between theoretical and practical learning in a real-life environment.
- To provide opportunities for interactive learning in-class as well as outside the classroom surroundings.
- To enhance professional skills.
- To widen students' viewpoint with experience to different workforces from different industries.

About Dam

Located in Joida Taluk of Dandeli, the Supa Dam marks its reputation as a hotspot for the travelers of Dandeli. Since ages, the Supa Dam has been acknowledged as one of the leading hydroelectric power generation plants in the town. The other significance of the dam construction has been availing the dam water to the nearby farmers to meet their irrigation needs.

So, if you are curious about how the irrigation system works, it is a golden opportunity for you to broaden the spheres of your knowledge reserves. You can get along with some technical expertise or even the local farmers to understand the mechanism of both hydroelectric power generation and irrigation facilities available here.

Apart from its commercial importance, the dam has been blessed with a picturesque backdrop to sit, relax, and unwind yourself. Due to its economic and cultural aesthetics, the location has become a popular sightseeing destination in town.

IDEAL INSTITUTE OF TECHNOLOGY, WADA

Industrial Visit for Computer science Engineering 7th Sem. Students

Introduction:

Computer Science arranged one day Industrial Visit for 7th Semester students to “**COMMTEX Solutions**” dates 10 August 2023 for the better technical knowledge enhancement of students.

The visit is important especially in the field of Engineering as the practice of engineering has an inherent (and unavoidable) impact on society. Being India’s First Skill Collage it is our prime focus on practical and skills. This program can be a powerful tool to constitute a positive industrial climate and can range from basic understanding to development for students.

Overall, this visit aims to train the students to adapt to changing scenarios of technology. After the visit students can identify their efficiency and performance which is important for their career, improving work efficiency and confidence.

Purpose:

Industrial visits are an integral part of Engineering and acknowledgement of technology upgrades. The purpose of industrial visits for students is to provide technical knowledge with the technological development in the industry and to understand the gap between theoretical and practical knowledge that could be passed in future.

This experience can help students to provide information regarding the functioning of various industries and associated problems and limitations.

Company Profile:

COMMTEX Solutions is established in 2005, IT System Custom Software Development Mumbai, Maharashtra.

Commtext Solutions (Commtext) is state-of-the-art information technology consulting, services and products organization founded for empowering individuals and corporate gain, maximum business benefits and seamless operating advantage in the information technology age.

Commtext Solutions provides ERP, CRM, SFA and SAAS based Platforms and systems and is a value added reseller for Cloud based ERP Solution - Microsoft Dynamics ERP, Acumatica, Epicor and OEM Partner of Salesforce.

What do We Learn?

There are various departments in the industry. COMMTEX Solutions has a big training centre where new employees get trained and older ones learn new technologies. It also hosts a big library that has more than 200 books on new technologies along with a digital library. They also have a dedicated block for clients where the meetings. Conferences, discussions with clients take place.

There were questions from the students about the deployment of projects, career, growth and project flow and distributions which were answered by the attendees there and hence many queries of students were solved.

Student Experience

It was our immense pleasure to visit the dream company COMMTEX Solutions **on 10th August 2023, Thursday**. Being a future software engineer it was a great opportunity for students of **B. Tech CSE 4th year** to visit the industry for the first time and groom ourselves into corporate professionals and acquire more innovative skills.

We visited the industry to interact and understand the latest technologies related to hardware and software. COMMTEX Solutions campus is a state-of-the-art facility with a distinct style that blends local culture and aesthetics with several world-class features.

We wish that someday we are there working and being called as **‘proud youth of India’**.

Conclusion:

From this visit, we got the information and practical knowledge about different departments/sectors in the IT Industry. As COMMTEX Solutions is completely working on Agile methodology. Students got the idea of what is this methodology and it's working. About 30 students of 7th Semester computer sciences Engineering Technology and faculty mentors Mr. Vikas Kumar and Deeksha Joshi benefited from this visit as they got a chance to discuss with the centre head and other engineers working at COMMTEX Solutions. Students learned the atmosphere and working culture which is shows the success of this visit

IDEAL INSTITUTE OF TECHNOLOGY, WADA

INDUSTRIAL VISIT REPORT

HMT, Ajmer, Rajasthan

A complete report on industrial visit organized by **Ideal Institute of Technology**, for the students of **Mechanical Engineering [3rd SEM]** in order to get the practical knowledge about “advanced technology used in manufacture of sophisticated moulds, dies and tools” carried out by HMT

INDEX:

DETAILSOFJOURNEY

COMPANYPROFILE

GROUPOBSERVATION

CONCLUSION

DETAILS OF JOURNEY

Tdeal institute of Technology had organized an industrial visit on 14 August ,2021 to GTTC located in Rajasthan industrial Estate for the students of Mechanical Engineering.

The visit was organized by HOD of Mechanical engineering branch Prof. Pramod Kumar Prof. Rajnish Kumar & Sunil M. Tupewer the co-ordinators Faculty for the industrial visit.

We started travelling from the college campus at 10:30 am via our college bus. Totally **22 students** along with **2 coordinators faculty** were there in the journey.

COMPANY PROFILE

Government Tool Room & Training Centre **A Society of Government of Karnataka**

HMT was established in 1953 at Ajmer with the participation of the Rajasthan State Government, in collaboration with the Government of Denmark under the Central Government. The excellent performance of HMT Ajmer, proactive Central government which saw the need for expansion,

Proliferation of technology for development of the industries with supply of skilled manpower is the key to meet the needs of the global requirement. With this Government of Central to start more centers to train in the area of tool and die making in various parts of India.

HMT is an autonomous society, and a recognized Scientific and Research Organization by the Government of India. Govt. Tool Room and Training Centre (is serving industry by way of precision tooling and providing in well trained craftsmen the area of tool and die making.

Today, the HMT have acquired mastery in mould and die making technology and have blossomed into an epitome of precision and quality in the development and manufacture of sophisticated moulds, dies and tools.

Fully aware of the rapid advancement in technology the world over, HMT is periodically adding new technologies to the existing set of advanced equipment like CAD / CAM, CNC machines for tooling, Precision Components, Laser for Industries, Rapid prototyping, vacuum casting etc.

HMT is concentrating on the Integrated Development of the related segments of industries by way of providing international quality tools, trained personnel and consultancy in tooling and related areas. In future, the focus would be more on turnkey projects in Tooling, Aerospace components & their assemblies, and also to support the development of small and medium scale enterprises.

GROUPOBSERVATION

- This Industrial visit is very helpful in our future practical life & bring a positive change in our thinking & practical behavior regarding Education & specializing our technical skills.
- Got practical knowledge about the advancement in technology of machines.
- Use of programming in field of Mechanical engineering.
- Precise cutting and surface finishing of the jobs.
- Information on different parts & use of CNC machines with multiple cutting tools.
- Making of plastic objects using "Injecting technology" of plastic.
- Different types of machines available for tool & die making
- Management of manpower and machines.
- Different courses offered by training section

CNCLatheMachine

LatheMachine&BenchVISE

CNC LatheMachine-Programming

MillingMachine

CONCLUSION

We are thankful for all our faculties for organizing such an Informative event for us in crucial for development of our practical skills regarding tool & die making & other activities.

We got the knowledge on different types of machines used in HMT and had an opportunity to research on it.

We hope to get more chances further to have such an informative & wonderful experience so far by visiting different industries.

IDEAL INSTITUTE OF TECHNOLOGY, WADA

A Report on

Industrial Visit for Mechanical Department 7th Sem. Degree Students

At

TECNIK FLUID CONTROLS PVT.LTD

Visit Coordinator (College):

Mr. Ketan Vishnu

(Department of Mechanical Engineering)

Event Coordinator (Industry):

Mr. Nilesh J. Modle

Organized & Managed By:

Department of Mechanical Engineering

Ideal Institute of Technology, Wada

Date: 8th August, 2019

Introduction:**Department of Mechanical engineering from Ideal Engineering**

College arranged one day Industrial Visit for 7th Semester Degree students to “Progressive Engineering Works”, DAHANU, PALGHAR, MAHARASTRA INDIA, dated 8th August, 2019 for better technical knowledge enhancement of students. Visit is important especially important in the field of Engineering as the practice of engineering has an inherent (and unavoidable) impact on society. These programs can be a powerful tool to constitute a positive industrial climate and can range from basic Fabrication system programs for students. Overall, the aim of all these visit to trains the students to adapting to changing scenario of technology. After visit students can identify their own efficiency and performance which important for their career, improving work efficiency and confidence.

Purpose:

Industrial visits are an integral part of Engineering and acknowledgment of technological up gradation. The purpose of industrial visit for students is to provide technical knowledge with the technological development in the industry and to understand the gap between the theoretical and practical knowledge that could be passed in future. This experience can help students to provided information regarding functioning of various industries and associated problems and limitations.

Interfacings with the industry also provide a chance to build networks and hone their communication skills. Moreover, the participating organizations also gain by getting refined students from the respective institute which could also help in improving their economy.

Company Profile:

Progressive is established in 2009 as a supplier of Self Structure, Sheet metal parts Progressive Engineering Works is striving hard with fullest of dedication, since 2009 to continuously improve the product quality & range as per the customers requirement.

What We Learn? :

On 8th August, 2019 We reached at PEW (Dahanu) by 10:15 AM. We got the entry at 11:30 AM. There are various departments in the industry. Generally two products have been made by the industry and that are Sheet metal and Fabrication We have seen the various departments like casting department, Finishing, and Quality and Inspection Department.

Various Products of Company :

Conclusion:

From this visit, we got the information and practical knowledge about Sheet Metals Parts and Fabrication Parts. Students got the knowledge about testing of Fabrication Parts or sheet metals parts . They got the idea how to made fabrication parts are made in industry and About 40 students of 8rth Semester Mechanical Engg. Of Ideal Institute of Technology & faculty named Mr. Ketan Vishnu

benefited from this visit as they got chance to discussion with in charge officer and other engineers working at industry. Students were eagerly to say organizing this type of industrial visit for practical exposure which is shows the success of this visit.

The students are identified in terms of their current caliber based on

1. continuous internal assessment,
2. performance and
3. class room participation.

As per the guidelines of AICTE, an induction program is organized before commencement of classes of I Year engineering courses in which students are informed about

- Institute policy regarding discipline,
- attendance,
- examination,
- placement etc.

During this programme, many physical and skill development activities are conducted to make students comfortable in the new environment and also to assess their level of learning.

Methodology for slow learner.

Some of the students are comparatively slow in terms of their grasping power. Counseling sessions are conducted to help such students to overcome the psychological and pedagogical problems. To improve their academic performance,

- Remedial classes are conducted where critical questions and/ or topics are being taken up and explained.
- Frequent absenteeism is conveyed to parents by respective batch counselors.
- Students are given placement related training and a set of mock interviews are also conducted to prepare students for their placement drive.

Along with that additional study material, subject notes, tutorial sheets, assignments etc are also provided to them.

Methodology for advance learner.

Advance learners have a high level of interaction during classroom teachings and in the laboratories.

- Expert sessions from academic and industry are organized for widening the horizon of these students.
- These students are motivated to take up MOOCs for enhancing their knowledge.
- The syllabus is also supplemented with the several experiments beyond syllabus. Some of the experiments on virtual lab are also referred to broaden the spectrum knowledge of quick learners.
- Such students are encouraged to present/write articles and assist in preparation of

institute's magazine, Different cells like Training & Placement Cell, Incubation centre, are established for their overall development. Many clubs are being run by students. The institute conducts CRT Programme and Soft skill training which is exclusively designed for the students preparing to get jobs in various industries. The T&P cell organizes virtual campus drives to trace the career interest of students.

2.1 Teaching- Learning Process

2.1.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

The institute has adopted student centric methods to boost their involvement as a part of experiential learning, participative learning and problem-solving methodology.

Experiential learning:

1. The institute focuses on imparting knowledge which enhances critical thinking and gives scope for creative imagination among students.
2. All the laboratories have a state of art infrastructure equipped with adequate number of experimental set-ups, computers & peripherals.
3. The institute has an incubation centre which provides a platform to students to convert their innovative ideas into reality.
4. The institute has recognized centre of excellence in IoT and Transportation engineering.
5. There are MOUs with Microsoft and Infosys to give experiential learning on Business intelligence, cloud computing and Internet of Thing (IoT), with corporate touch to students and to give experiential knowledge to students
6. Faculty members and students are encouraged to do courses on MOOCs..
7. Students are sent to industry for visits and to undergo internships to understand how industry functions and its requirements.
8. robotics lab is set up in the Institute with the support of e -yantra,
9. Besides the practical work in laboratories, the institute also organizes field survey camp

to enhance the ability of students for collection and analysis of raw data with appropriate approaches and methods.

Participative learning:

1. The students open up and put forth their views on subject(s) to contribute, which improves their analytical ability.
2. The students are encouraged to participate in debates and presentations where they express their different opinions on a particular topic and present their learning.
3. The institute has a number of technical/non-technical clubs which are managed by students. Students are encouraged to join clubs of their choice and also to participate in various events.
4. Projects are assigned to a group of students which encourages them to work in a team and also enhance their learning.

Problem solving Methodologies:

1. A group of 30 students is formed for a tutorial class. These problem-solving classes are planned with the regular time table.
2. Numerical problems occurring in the University examination and other typical problems are discussed in lecture and tutorial classes.
3. Assignments having standard and application-based problems are given to students and after submission, these are assessed by the faculty members.
4. Projects based on real-world problems and challenges are given to students which encourages them to find creative and innovative solutions.

Special GATE classes for advanced learners are conducted by experienced faculty members.

2.3.2 Teachers use ICT enabled tools for effective teaching-learning process.

Response:

The Teaching – Learning environment is always very challenging and exciting. There are newer ways to dig out for making this process interesting and meaningful. The institute has implemented ICT enabled teaching in addition to the traditional classroom education to improvise teaching learning process in the most creative and innovative way:

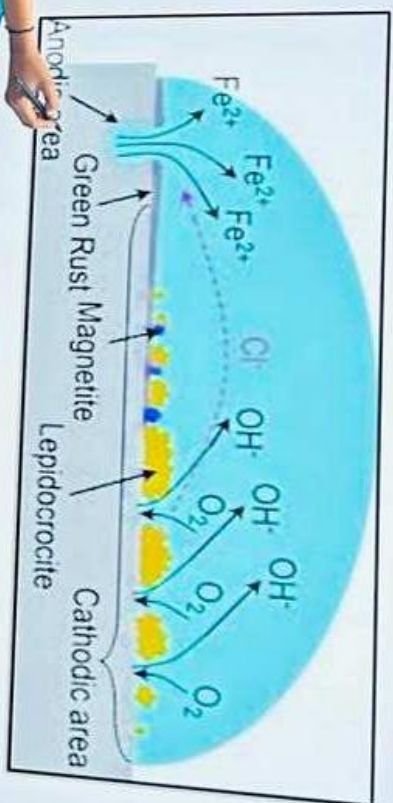

1. IT enabled learning tools such as PowerPoint Presentations (PPTs), video lectures, online sources like MOOCs, NPTEL, SWAYAM etc., in addition to conventional chalk-board method are used by

Spool Valve

Controls direction of flow of fluid in a hydraulic system to cause the different parts of the system to function.

Formation of green rust

Packet Switching

- To improve the efficiency of transferring information over a shared communication line, messages are divided into fixed-sized, numbered packets
- Network devices called routers are used to direct packets between networks

Figure 15-4
